Practical Takeaways

How to Build a Process

- Schedule one-on-one staff trainings
- Share with staff, tech staff
- Focus on digital citizenship within our computer classes
- Schedule a self-learning time every week
- Investigate new tech web sites
- Identify specifics that can be taught quickly and efficiently
- Definitely investigate some of the online digital literacy tools mentioned here
- Supervisors can let staff choose what they want to learn, as long as they share with others after
- Nag my staff about continuing to learn about technology. :)
- A great idea for supervisors (archived webinar) If you give your staff an hour...

How to Learn as a Community

- Sharing Archive of this webinar with staff.
- Share web resources with reference staff
- There are so many wonderful librarians and vendors in online listservs. And there are so many wonderful webinars.
- Start conversations with other staff about this webinar. Yay for archives!
- Start a "tech tips" column in our newsletter or website for a start
- Learn what digital citizenship means to various people
- Create a bookmark central where staff can contribute training ideas, etc.
- Share helpful websites with staff at staff meeting

How to make it Fun

- Have MORE CE in the projector room for ALL to watch together
- For our staff training, maybe come up with some sort of certificate/prize or something
- Brainstorm with management team on some of the ideas presented ere
- The computer projector room that is
- We will work on short lessons (15 minutes) to take to local senior centers, along with tip sheets for basic skills.
- I love the idea of short lessons in the community!
- have an activity that will make the discussion fun
- At Brainstorming meeting, suggest 1 new process to teach patrons
- Offer one on one appointments that are more like a readers advisory conversation
